HASCO®

Enabling with System.

The 100 % Promise.

Mouldmaking starts with HASCO.

1924
Company founded

1936
Press tools and injection mould manufacture

1962
Introduction of the Standard Mould Base

Every success story starts with a basic idea. Ours is to offer you the best possible solution for mould manufacture. We invented the “Standard Mould Base“. HASCO operates globally and enables innovations for faster and better projects.

1968
Establishment of our own sales and distribution

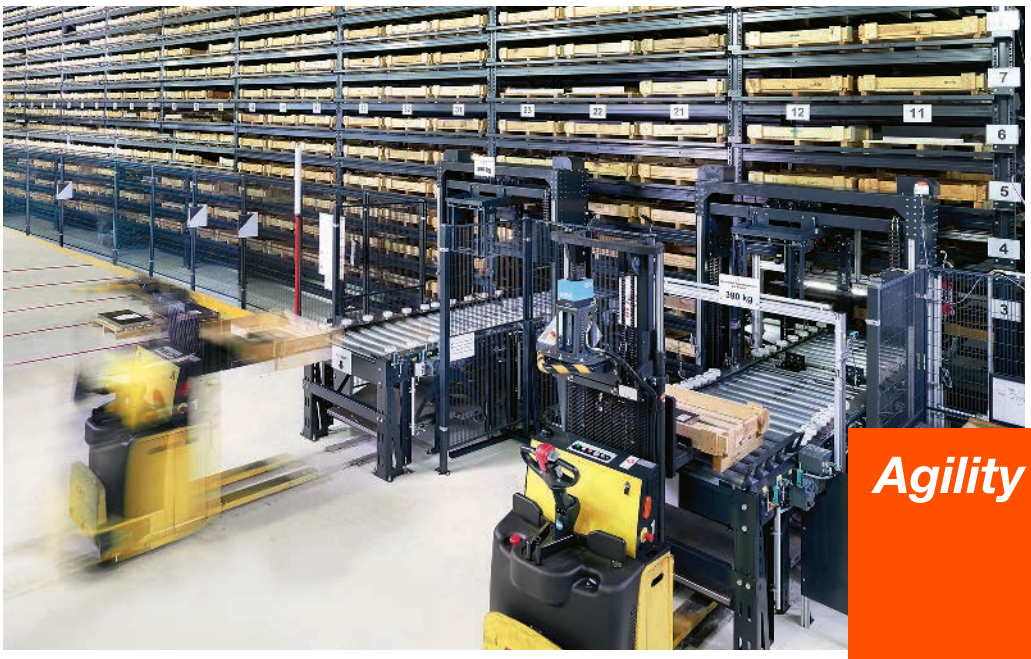
1973
Global expansion

2008
Technology offensive

2012
Fully automated plate production

2014
Sharp aligning of the brand

Our brand values



We recognise and respond to your needs and those of the market.

Agility

We enable mouldmakers, injection moulders and designers the easiest way to build moulds.

Simplicity

We work continuously on new products and services to be your optimum development partner.

Innovation

Everything we do and our commitment are aimed at your success.

Performance

Innovation

- HASCO product development in-house
- From prototype to product
- High innovation frequency
- Innovation partnerships with customers
- Increased productivity for mouldmaking

We create specific innovations for mouldmaking and the injection moulding of plastics.
We are proactively always searching for new possibilities for simplification and develop them in close dialogue with our customers.
Don't hesitate to get in touch with us to tell us your ideas: idea@hasco.com

Standardisation

As the inventor of the standard mould unit, we think in modular units. With our mould-building expertise and good ideas for standardisation, we are constantly expanding our full range. As a result, we can always further simplify your processes with a high level of individualisation and customisation.

– Full range
– 100,000 products
– Standardised and configurable

HASCO Steel

Hard-as-steel facts: quality mould steel from top European suppliers. The strict German standard is significantly exceeded by the HASCO raw material specification. Product labelling for traceability back to the origin. Many special steels are possible.

– Highest-quality material
– Annealed for low stress
– Easy machining

HASCO Production

Apart from development, our production is the heart of HASCO. Permanent machine and plant investments ensure agility and top performance. In the perfect interplay of man and machine, we combine precision with speed.

- Extensive production facilities across Europe
- High-end machining
- State-of-the-art machine technology
- Guaranteed precision
- Standard and customised part production

Quality

Constant uncompromising HASCO quality has one goal: to ensure quality and productivity in your production processes. We support you in this. For example through our quality-assuring HASCO mould specification.

- HASCO process management
- Continuous product identification, traceability
- Certified quality to DIN EN ISO 9001, DIN EN ISO 50001
- Quality assurance through HASCO mould specification

Reliability and competence

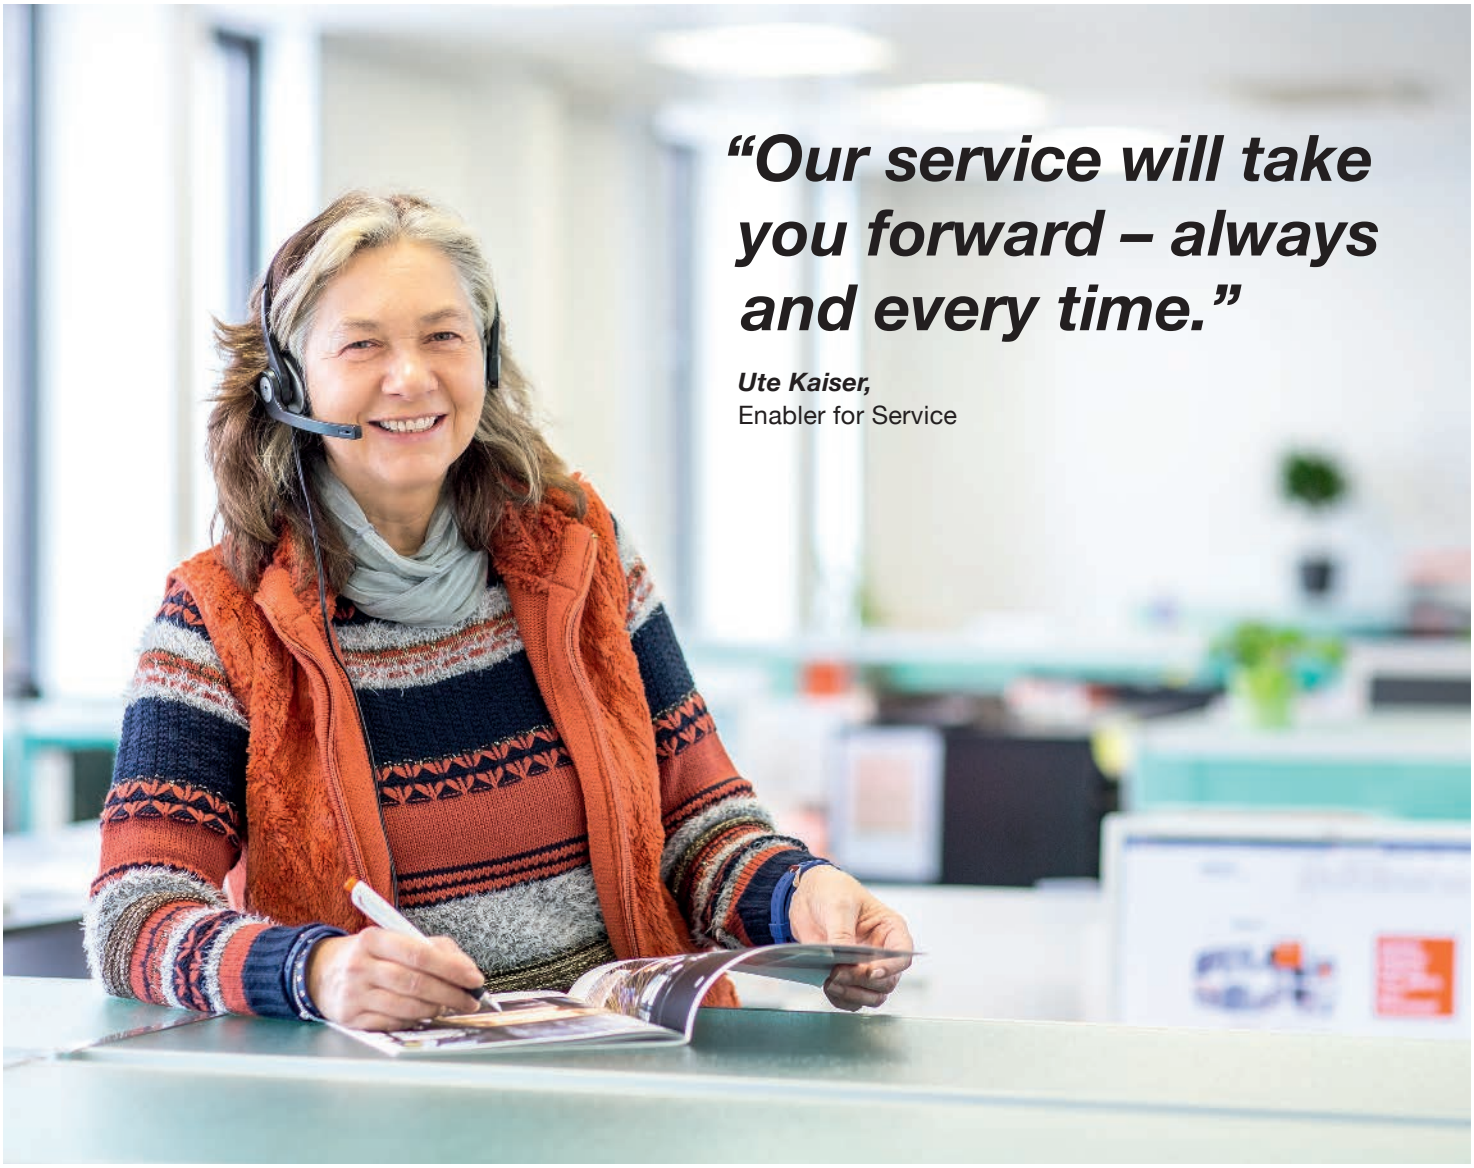
HASCO supplies you with top products plus expert advice. Our 150 technical sales engineers are designers, mouldmaking specialists, engineers and injection moulding experts. Reliable partners and competent professionals always on hand to advise.

- Personal support from ordering to delivery
- Partners with mouldmaking and injection moulding expertise
- 90% of response times within 2 hours

Worldwide service

We provide individual service whenever you need it – from person to person. From us, you receive advice and support through expert partners on site. Or you can contact the HASCO Portal 24/7: Configure, calculate and order moulds online …

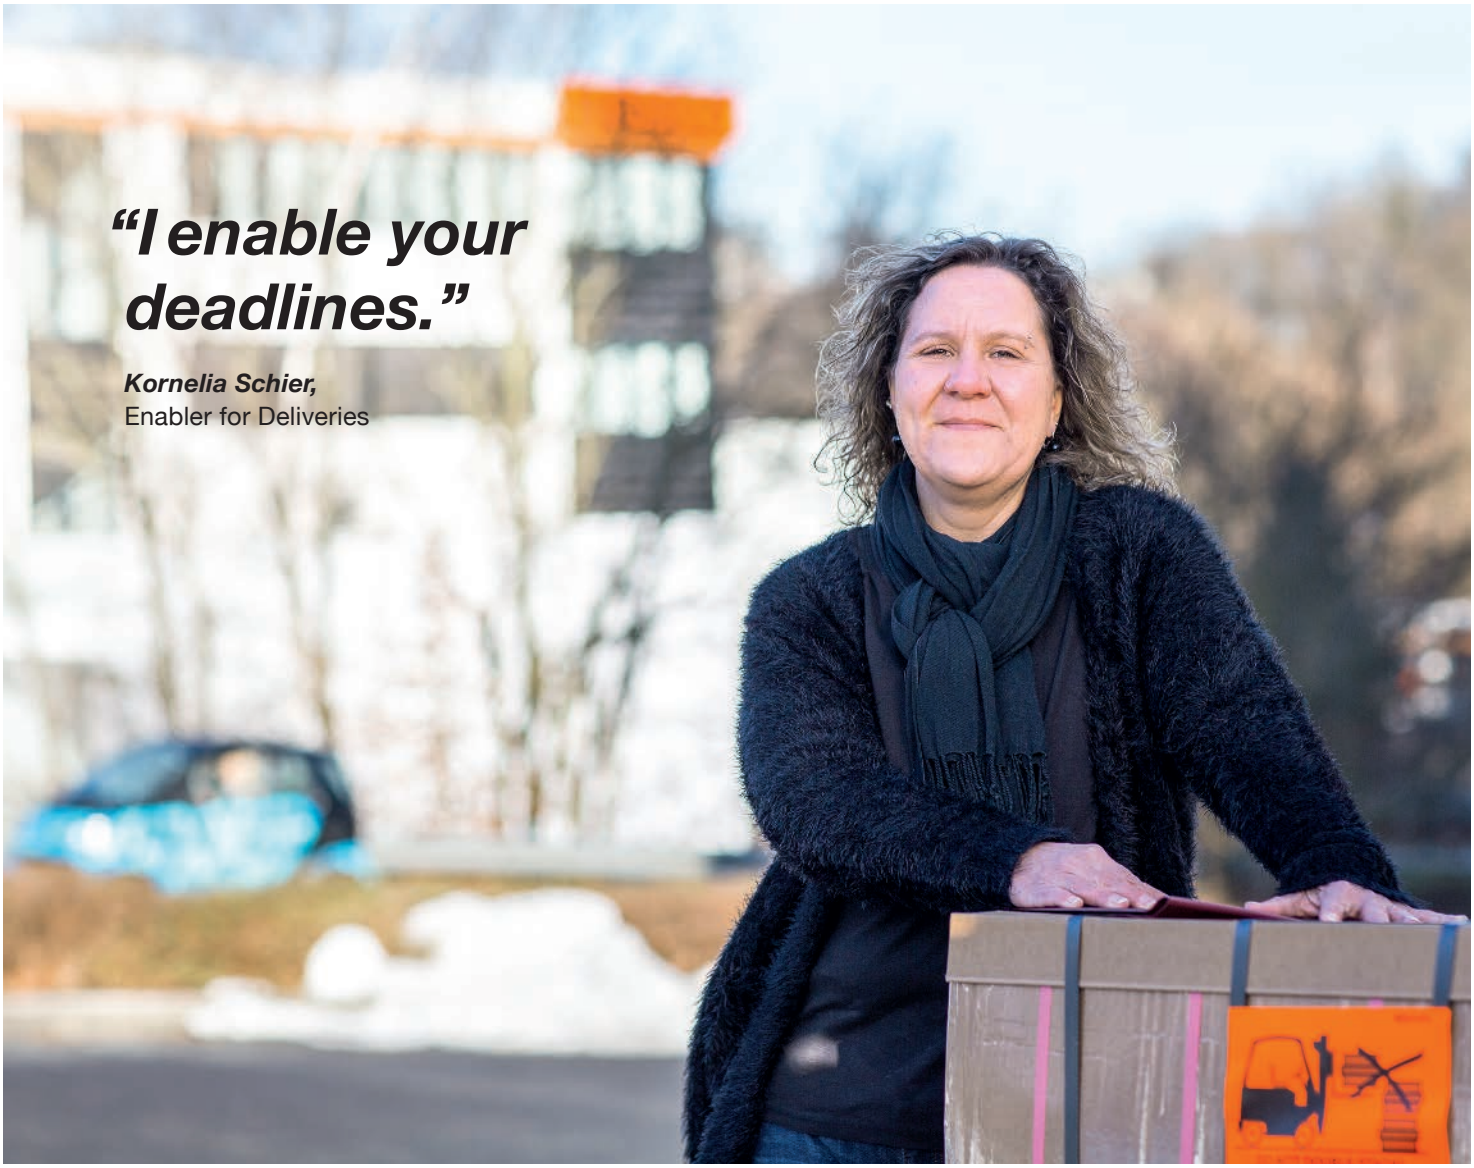
- 35 locations in Europe, America and Asia
- 24/7, prices, technical know-how, availability
- Full integrated processes in the HASCO Portal
- Easy search and find
- Logical, fast access to CAD data



Delivery speed

HASCO enables reliable logistics. On both a small and large scale. Regional, national, international. We deliver 600 parcels daily and 200 pallets with 25,000 products worldwide. Cost-optimised at maximum speed.

– 24 hours delivery
– 99% availability ex stock
– 95% complete delivery
– Freight-free within the EU
– Logistical competence, worldwide



Future

At HASCO, the future has nothing to do with chance. We plan the future in the interests of our customers and employees. We practise human resources development and product development intensively and proactively. We attach major importance to training and cooperate closely with schools, universities, colleges and research institutes. HASCO designs the future.

- Training – 100% HASCO right from the start
- Continuous personnel development
- Investment in technology and digital services
- Expansion of the global network
- Cooperation with research institutes
- Enabler for mouldmaking
